

It is important to reject NAB's petition 04-160. I commute into the Capital and travel to several Federal offices in DC for meetings every day of the week. I rely heavily on XM radio for music to survive the beltway traffic. The weather and traffic reports are absolutely vital for me to arrive at work and my meetings on time. The up-to-the-minute traffic reports allow me to pick the best route into DC and change my route at the last minute, if necessary. The NAB's efforts are an attempt to restrict my choices in what I listen to and where I get my information. America is supposed to be based on freedom of choice--let us have our freedom of choice.
